

Health Market Science

Health Market **Science**

The building blocks of success.

Health Market Science (HMS) is a privately owned company that helps healthcare organizations solve business challenges centered on healthcare provider information. Ranked in the Inc. 5000 for seven consecutive years, HMS uses Big Data technology and domain expertise to build solutions that help clients comply with evolving federal and state laws, reduce operational costs, and maximize market opportunities.

Its solutions are based on its proprietary databases, including more than 7M healthcare providers (HCPs) more than 450K unique healthcare organizations (HCOs) and their affiliations, as well as a vast volume of medical claims. HMS' comprehensive solutions are based on a proven data accuracy advantage, offering clients unprecedented access to a robust database of practitioner insights, claims histories, and general relevant industry data.

Headquartered in King of Prussia, PA, HMS has contracts with the top 20 global pharmaceutical companies, and was selected to help Medicaid agencies with CMS ACA 6028 implementation.
